

MFC TRANSPORT PVT LTD – CASE STUDY – HALDIA IOCL REFINERY INNOVATION AND SOLUTION ORIENTED LOGISTIC SERVICE PROVIDER

MFC was given a challenge to transport 2 equipment's with dimension 12m x 6m diameter and weighing 90 tons each from west coast (Mumbai) to east Coast (Haldia IOCL Refinery).

Customer wanted the equipment to be delivered within 90 days and MFC safely & successfully delivered it in 62 days.

Transporting the packages with 6m diameter by road in itself is a challenge keeping in mind the vagaries and conditions of the Indian roads coupled with enroute high profile events (Kumbhmela2019) scheduled during the tenure of this movement.

Meticulous planning and deployment of senior resources keeping in mind the urgency of the requirement at the site assisted us to deliver the packages in time and safely.
