

ENERGY - OIL AND GAS – MFC TRANSPORT PVT LTD

AT BPCL KOCHI, KERALA, (INDIA), MFC RECKONED AS A BRAND WITH PHENOMONAL SUCCESS

TEAM MFC, keeping up with its Market reputation and customer's confidence, is the first to deliver the most challenging job at BPCL Kochi, through an end-to-end multimodal operation viz. Road – Waterways – Road, fully conceived, planned, managed and handled by the MFC Team.

The journey Started from the outskirts of Mumbai to BPCL Kochi (Kerala) with almost similar Seven supper ODC packages having dimensions as **18.550m x 6.400m x 6.500m (82 tons)**.

The consignments were moved on Hydraulic Axles, Rolled on to a waiting Barge in the outskirts of Mumbai, to be finally moved to Kochi Port and ultimately to BPCL Kochi Refinery by Road. The total Road distance covered is (40+21 Km), 590 nautical miles on waterways.

The main hurdle was the last leg of road transportation at Kochi city. BPCL Kochi Refinery falls very much in the heart of the city, over casted by cables, electrical wires and over lapping trees. Thereby movement of any cargo with height above 5mtrs from the ground level is restricted and makes the journey difficult and tedious for which many service providers were hesitant to accept the challenge.

Fully confident team MFC accepted the challenge and translated concept into reality and thus became the 1st logistics service provider to have achieved this coveted position for BPCL KOCHI. – DEC 2013

PROJECT LOGISTICS * END-TO-END * MULTIMODAL * HANDLING AND TRANSPORTATION
